**MANAGER**: Your initial on this form acknowledges that the service establishment has disposed of its grease in a lawful manner, accounts accurately for the volume of grease disposed and that the interceptor has been maintained properly.

If the grease and solids occupy greater than 25 percent of an interceptor's capacity, the FSE is required to perform a full cleaning of the grease interceptor. Cleaning must be performed by a licensed waste hauler with an approved license from an authorizing agency. Both vaults of a grease interceptor shall be left completely empty upon completion of pumping operation. The grease mat, liquids, sludge, and scrapings from the interior walls must be removed. Under no circumstances, may the waste hauler reintroduce the removed water or materials be reintroduced into the City's sewer system, other than at qualified disposal stations. Flushing an interceptor with hot water, or the use of chemicals or other agents to dissolve or emulsify grease and allow it to flow into the wastewater treatment system, is a violation of City Code. Since the FSE is the generator of the grease waste, is liable for the condition of their pretreatment devices, and is paying for the cleaning service, the FSE owner or designee may want to witness all cleaning/maintenance activities to verify that the Grease Interceptor is being fully cleaned and properly maintained.
